

## DO YOUR TEAMS CONSISTENTLY BEAT EXPECTATIONS?

**Summary:** To continuously deliver strong results, teams need the ability to rapidly diagnose and enhance performance. Our approach to Driving Performance Improvement (DPI) embeds critical problem-solving skills into your organization and teams.

## WHO NEEDS THIS SERVICE?

Teams that would like to:

- boost sales regardless of the current performance
- have a systematic approach to tackling business issues
- learn proven techniques and tools for problem-solving
- improve the quality and speed of decision-making
- realize benefits of training without the high cost

Toyota's focus on "Kaizen" – *the practice of continuous improvement* – helped the company go from a virtually unknown car manufacturer on the brink of bankruptcy to the #1 car manufacturer worldwide.

## OUR APPROACH AND OFFER

CapSys Group is a "next generation" consulting firm focused on strategy execution in the Life Sciences industry. We have a pragmatic approach to driving business performance that we have repeatedly delivered to clients with high-quality and high-impact results since 2008. It is based on 3 steps that allow teams to systematically and continuously address performance:

### 1. Diagnose Performance

### 2. Develop Actions

### 3. Deliver Results

We have a flexible offer that allows companies to make a cost-effective investment in the professional development of their people. This includes:

- **One-day Standard DPI training** that extends beyond the classroom (\$500 per participant)
- **Half-day Workshop** with your team on a specific business issue (typically \$15,000 per workshop)

If you would like to improve performance, please contact us for an initial discussion.
